

We express our full solidarity with the Finnish unions that started an action against the Farright government.

As we know all over Europe, when the rightwing and populist political parties participate to government, they attack the workers' rights, their cba's, social security systems and not to forget the trade unions.

This also happens in Finland with a government where the "Real Fins" participate and develop an anti-union policy, attack the labour legislation and break down the possibility to negotiate cba's.

This is a giant leap backwards when it comes to the social security of the workers.

That is why BTB, the Belgian transport union, and ABVV-Metaal, the Belgian metal workers' union, fully support the strike action of our Finnish comrades trade unionists.

Their struggle for social justice is our struggle. What happens today in Finland can happen tomorrow in Belgium. We will not accept it!

Rohnny Champagne  
President ABVV-Metaal

Frank Moreels  
President BTB
